Submitted by [Shanghai Puteken](#)

Shanghai Puteken Transmission System Co., Ltd., a pioneer in premium power transmission solutions, proudly announces the launch of its latest innovation — the A13(4L) Power Twist V Belt, specifically engineered for woodworking applications. Designed with a blend of polyurethane and polyester composites, this revolutionary belt is reshaping how workshops around the globe maintain and upgrade their machines.

Whether you're operating a high-performance lathe or a precision drill machine, the [Power Twist V Belt](#) offers a flexible, resilient, and easy-to-install alternative to conventional rubber V belts. With outstanding resistance to chemicals, a smart modular design, and dramatic vibration reduction, this new-generation belt makes downtime a thing of the past.

Woodshops Rejoice: A Smarter Belt Has Arrived

In woodworking, efficiency is everything. And when belts break or machines go down, time is money. The A13(4L) Power Twist V Belt is here to change that narrative. Crafted from high-quality polyurethane and reinforced with durable polyester, this belt is engineered for performance, longevity, and — most importantly — convenience.

Traditionally, replacing a V belt meant partially dismantling your machine, a time-consuming and frustrating task. Not anymore. Puteken's link belt technology allows for quick, on-the-spot length adjustments — even when the belt is inside a closed drive system. Say goodbye to production delays, and hello to uninterrupted craftsmanship.

THE EVOLUTION OF WOODWORKING BELTS BEGINS NOW

Woodworking professionals have long needed a belt that's not only strong and wear-resistant but also adaptable and easy to manage. With its launch of the A13(4L) [Power Twist V Belt](#), Puteken is answering that call.

As a trusted name in transmission systems, Puteken continues to invest in forward-thinking products that offer:

- **Quick Installation & Adjustment:** Modular design means no dismantling of machinery.
- **Chemical Resistance:** Built to withstand oil, grease, and harsh shop environments.
- **50% Vibration Reduction:** Enhanced joint structure for quieter, smoother operations.
- **Custom Fit for Every Machine:** Easily cut and joined to suit any required belt length.
- **Enhanced Longevity:** Superior materials resist wear, cracking, and deformation.
- **Multiple Design Options:** Available in red power twist, orange nut link, and rounded link styles.

"Our **Power Twist V Belt** is not just a product — it's a productivity tool," says the R&D Director at Shanghai Puteken Transmission System Co., Ltd. "It empowers businesses to spend less time on maintenance and more time building quality products. We're proud to bring this to the woodworking industry, where reliability is everything."

THE IDEAL BELT FOR WOOD MACHINES, LATHES & DRILLS

Designed to seamlessly replace standard rubber V belts, the A13(4L) is compatible with a wide array of woodworking machines — from table saws and drill presses to jointers and sanders. Whether in a professional workshop or a high-volume production facility, the performance advantage is immediate.

With multiple colors and shapes — including Puteken's signature red power twist link, vibrant orange nut link V belt, and sleek, rounded shape link belt — professionals have the flexibility to match belt aesthetics with functional precision.

BACKED BY INNOVATION, BUILT FOR PERFORMANCE

What sets the A13(4L) [Power Twist V Belt](#) apart isn't just its impressive specs — it's the engineering philosophy behind it. Puteken has long focused on simplifying mechanical design while optimizing functionality. The modular nature of this belt

removes the need for exact length matching or complicated setups, which in turn reduces manufacturing cost and machine complexity.

This belt is particularly useful for facilities aiming to reduce machine downtime and cut labor costs. Instead of storing multiple belt sizes for different machines, shops can keep a roll of Power Twist Link Belt on hand and create the perfect length on demand.

Making an Impact in the Woodworking Industry

With global demand rising for smarter, more reliable machine components, Shanghai Puteken Transmission System Co., Ltd. is positioning itself as a key player in the evolution of industrial belt technology.

The company's latest release isn't just a better belt — it's a strategic upgrade for any operation. Whether you run a small woodworking shop or a large-scale factory, the A13(4L) **Power Twist V Belt** brings tangible improvements in productivity, safety, and operational consistency.

AVAILABILITY AND ORDERING INFORMATION

The A13(4L) **Power Twist V Belt** is now available worldwide via Puteken's distribution partners and online store. Customers can choose from three color-coded variants, each optimized for different applications:

- **Red Power Twist Belt:** Classic, versatile, and rugged
- **Orange Nut Link Belt:** Strong and distinctive for easy identification
- **Rounded Link Belt:** Best for quiet, minimal-friction operation

Customer-Centric Design from the Ground Up

At the heart of every Puteken product lies a dedication to solving real-world problems. That's why the A13(4L) isn't just technically advanced — it's also incredibly user-friendly. From DIY machine operators to seasoned factory technicians, anyone can benefit from the tool-less installation, cut-to-length flexibility, and vibration-reducing engineering.

Performance Meets Practicality

With the A13(4L) **Power Twist V Belt**, Shanghai Puteken Transmission System Co., Ltd. has raised the bar for what a V belt can be. By blending rugged materials with user-first design, the company is delivering an advanced solution that simplifies maintenance, extends machine life, and increases efficiency.

ABOUT SHANGHAI PUTEKEN TRANSMISSION SYSTEM CO., LTD.

Shanghai Puteken Transmission System Co., Ltd. is a leading provider of innovative power transmission solutions for industrial and mechanical applications. With a focus on quality, durability, and user-centric design, Puteken offers a wide range of products including PU timing belts, link belts, conveyor belts, and more. The company serves a global customer base, providing reliable components that keep machines running and industries moving.

About Puteken launches | power twist v belt

Discover unmatched performance with the **Power Twist V Belt** from **Shanghai Puteken Transmission System Co., Ltd.** Engineered for flexibility and durability, this high-quality link belt is ideal for reducing vibration and extending equipment life. Easy to install without dismantling machines, the Power Twist V Belt ensures optimal power transmission and minimal downtime. Perfect for various industrial applications, it resists oil, water, and temperature extremes. Upgrade your machinery's efficiency with this innovative solution trusted by professionals worldwide. Choose performance. **Choose reliability.** Choose Power Twist V Belt.
