

Why an Industrial All in One PC Is the Smart Choice for Streamlined Workspaces!

ValanoIPC today announces the launch of its latest offering in industrial computing: the “[Industrial All in One PC](#),” designed to meet the rigorous demands of modern automation and control applications. With this new solution, ValanoIPC sets a new benchmark for performance, durability, and versatility in the industrial panel PC market.

The new [Industrial All in One PC](#) features a 15.6-inch full-HD display (1920×1080) with optional 10-point capacitive G+G touchscreen technology, delivering high precision and intuitive operation. Coupled with a robust, fanless and passively-cooled system housed in an aluminium alloy die-cast casing, this unit is engineered for silent and maintenance-free operation in harsh production environments.

Key features of the Industrial All in One PC include:

- Fan-less, vibration-resistant design with wide-temperature operation from -10°C to 60°C (storage -20°C to 85°C), ensuring dependable uptime in challenging settings.
- Wide voltage input (DC 9–36 V) and built-in protections against short-circuit, over-voltage, and reverse polarity, enabling safe integration in industrial power systems.

- Extensive connectivity, including dual Intel Gigabit Ethernet ports, multiple USB 3.0 ports, HDMI, and COM ports (RS-232/485 capable) to support diverse machine interfaces and automation protocols.
- Powered by Intel® Celeron® (Tiger Lake UP3) or Alder Lake-U/P/H series processors, offering high-performance computing for real-time monitoring, HMI, and control system tasks.
- Flexible mounting options — embedded, wall-mounted, or desktop — enabling seamless integration into factory floors, control rooms, and logistics hubs.

This new model is ideal for a wide range of industrial scenarios — from machine-tool control, production line HMI, warehouse automation, to building-automation dashboards.

Manufacturers who paste-mount or embed PC-based control cabinets will benefit from a single-unit solution that minimises cabling, reduces footprint, and simplifies maintenance.

About ValanoIPC

[ValanoIPC](#) specialises in industrial computing solutions, including panel PCs, embedded box PCs, rugged tablets, and monitors. With a global customer base and dedication to innovation, ValanoIPC supports OEM/ODM clients with tailored designs and reliable manufacturing for industrial applications.

A dark blue banner for Valano Technology. On the left, the company name 'VALANO TECHNOLOGY' is in large white letters, followed by a quote: "Valano is a leading supplier of industrial pcs, panel pcs, rugged tablets, network security machines." In the center, there are three contact options: a phone icon with the number '+86 13556025664', an email icon with 'marketing@valanoipc.com', and a globe icon with 'www.valanoipc.com'. On the right, there is a circular inset image of a woman in a white shirt and headset, pointing upwards with her right hand.
