INTRODUCING

Whatever type of stone top you are looking for, we have it. Suitable for kitchens and bathrooms, our stone worktops are tough, practical, and beautiful to look at. Use them to create an eye-catching feature that adds class and character to your space. Here you will find quartz worktops, granite worktops, ceramic worktops, and Dekton worktops.

QUARTZ WORKTOPS

Bringing together qualities of durability, strength and toughness, nothing adds a touch of elegance to a home more than composite quartz.

GRANITE WORKTOPS

Formed from molten magma, granite is durable and tough. Much loved for its depth of colour, shades vary from pale pinks through to grey and black. Some granite even comes with natural silver or golden specks, depending upon its mineral formation.

CERAMIC WORKTOPS

A true classical beauty, whether you are installing units from scratch or renovating, ceramic is easy to match with existing worktops.

DEKTON WORKTOPS

Dekton has to be one of the most wonderful materials out there. Resistant to heat, stains and scratching, it is a clever choice for worktops. Wonderful to touch and very sophisticated, it is formed from a mix of glass, quartz and porcelain.
